**A company's environmental performance is regulated through an array of Federal and State Acts, Regulations and Policies. These policies are rapidly changing particularly in the area of greenhouse and climate change, resource efficiency and waste management. Failure to understand and comply with these obligations may result in significant penalties to your business.**

This two day intensive Workshop will provide participants with the tools necessary to identify and understand the appropriate regulations and requirements that apply to your organisation today.

The Workshop is especially relevant for those who have recently assumed responsibility of environmental management or those seeking experience and understanding of this dynamic area of business management.

The Workshop will provide information on a range of topics:

- Environmental laws—State and Federal, planning, due diligence and licensing;
- Greenhouse, renewable energy targets;
- Hazardous waste, air, noise, land and water control issues;
- Waste minimisation, transport & disposal;
- Identifying and managing site environmental issues;
- Beyond compliance and achieving sustainability;
- Managing environmental risks;
- ISO 14001 Environment Management System;
- State Environment Protection Policies.

Comprehensive set of notes, lunch & refreshments will be provided each day.
